As we were driving, a grizzly bear was spotted on a faraway hillside grazing. Wish he would have been closer to capture a better shot. Cool no less.

Wildflowers were abundant in Yellowstone. I really should have taken more pictures of them. They make pretty computer backgrounds!

Fun rock area with some random girl I didn't know was there until after I snapped the picture.

The other side of the rock area

Elk took some photos and saw a couple people taking the picture. It was a great area for enjoying the view and the animals.
