[video:http://www.youtube.com/watch?v=pxhK1WiQ6pI 600x600]

There is a little dead tree right by the garden and when we began preparing the garden, we noticed that a woodpecker was in it. Today when I was out in the garden checking things out, I heard a lot of racket from the tree. I already had my camera so I turned it on the video and took some movie. I didn't know that both mommy and daddy woodpeckers feed their young! Wish I would have had my real video camera or the flip. It would have come out better and I would have been able to zoom in on them nicer. Enjoy it. I did!
