So wish me luck as I try YET ANOTHER YEAR to grow pumpkins to full term. I get them all happy and as the summer rolls on by the wither away. If you know me, pumpkins are right up there in the love category as 4-leaf clovers. I hope by actually mounding them this year they respond and do well. I roped Brady into planting them for me this time. I am sure it will be the magic touch!

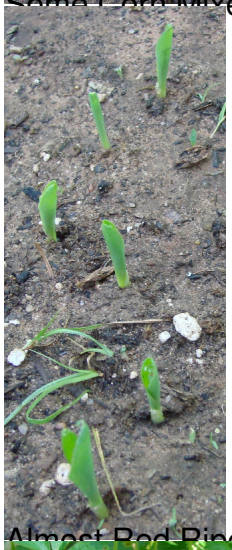

Pumpkin Seeds:

Watermelon Seeds:

Some Corn Mixed with Grass :)

Almost Red Ripe Strawberries!
